

STUDY 1 by CATRIONA MUIR LCHom MARH

– PATIENT QUESTIONNAIRE

All information is private and confidential

Name of patient:

Parents name if under 18:

Address:

email address:

Age of patient:

Formal Diagnoses (eg PANDAS, ASD etc)

Current ATEC score if known; (you can check score here https://www.autism.com/ind_atec)

Please number the following from 0 to 10 with 0 being similar to a neurotypical child and 10 being extreme behaviour or zero lack of ability. Eg for speech, 0 would be clear, coherent and typical speech for age, 10 would be no attempts at sounds. Try not to dwell, nobody is judging, this is only to record if there has been any progress after first four weeks. The numbers will only be compared against your own numbers in four weeks, not against any other children.

EXAMPLE;

Speech 6

Stimming 6

Aggression 2

YOUR ANSWERS

Speech

Stimming

Aggression

Obsessive behaviours

Hyperactivity

Receptive language/understanding commands

Cognition tasks eg table top work

Awareness of surroundings

Social skills

Anxiety

Seizures

Food restrictions

Gross motor skills (eg running, climbing)

Fine motor skills (eg using small toys, zips etc)

Reading and or writing

Self sufficiency skills eg toilet training, putting on shoes

Sensory issues

Anything else?

What supplements is your child currently on?

Are you currently taking anything homeopathic? If so what?

Are you currently doing any adjunctive therapies? Eg ABA, ACC, HBOT, parasite protocol etc?

Have you ever tried homeopathy for your child before? Please give details

This study is only for those who agree to the following for the first four weeks of the trial;

Not to use any other homeopathic remedies.

Not to start any major new protocols eg ACC, HBOT that you are not already doing.

To contact me before you make any supplement changes, some are minor, some could skew the results.

If your child has a detox reaction you must stop remedies immediately, let things settle and contact me before resuming. Mild short lived detox reactions are common in homeopathy, eg a rash, a cold, etc but are shortlived. We do not continue to dose whilst the body is adjusting. They are often a positive sign of healing but we let the body settle before resuming we do not continue to dose regardless. I will be using a low dose so do not expect any major reactions.

You may stop the trial at any time.

If you complete the trial and report back the same questions after four weeks you will be helping others to learn if this remedy is useful in autism. You will also receive a 25% discount code against any personal consultations from me. (After four weeks you can add other remedies and protocols and you can continue the remedy if you feel it is useful and report back ad hoc).

Although adverse reactions are unlikely at this low dose, by taking part in this trial you understand that neither I nor any sources where you learned of this trial can be held responsible for any adverse reactions.

You agree to any data results being shared (anonymously) on my website and with other participants (anonymously) of the trial.

You agree to pay postage costs from UK via paypal (remedies are free, postage should be less than £7 to most countries). You will receive the remedies approximately 10-14 days after payment of postage and can start straight away.

Signed (type your name and email address).

Please email completed form to catmuir7@googlemail.com

LOOKING FORWARD TO WORKING WITH YOU :)
